THE LAST BELL FIX™

The last few minutes of the day, run by The Fixes. The class votes the best part of the day, practises what to tell their family, copies tomorrow's agenda into their communication books and says goodbye.

SET UP ONCE (1 MINUTE)

1. **Open** The Last Bell Fix in the last 10 minutes of the day and tap the gear button (top right). Add your class name.
2. **Our day:** using The Fixes Schedule on the same computer? The best-part cards are today's schedule automatically. If not, list your usual subjects, one per line.
3. **Optional:** edit the reminder chips you use most (forms due, library books, picture day) and set the partner talk timer.

Everything is saved only in that browser on that computer. No accounts and no student names.

THE SIX STEPS

STEP	WHAT THE CLASS DOES
1 Best part	"What was the best part of today?" Tap a card once for every hand. Most hearts wins. Too many? Tap −. **Something else** covers the surprises.
2 Take it home	The winner becomes "Tell your family about…". Add a few words if you like ("sink or float"), then start the partner timer and everyone practises saying it.
3 Tomorrow	Tomorrow's day appears by itself. With The Fixes Schedule, gym, library and music show up automatically ("Gym: wear running shoes"). Tap any reminder chips. Nothing to type.
4 Agenda	The date, the best part, tomorrow and reminders on real primary writing lines, ready to copy into communication books.
5 Our year	Every day's best part joins the class timeline. Fridays become a week in review.
6 Goodbye	A different goodbye every day, a one-tap clean-up race, and "See you tomorrow!" from the whole crew.

AGENDA ON REAL WRITING LINES

Every letter sits where it should. Letters rest on the baseline, short letters reach the dashed line and tall letters touch the top line, even when a line wraps.

Short (K–1) or **Sentences** (2–3). Tap any line to change the words.

One line at a time shows one big line for younger writers. The dots show how many are left. Tap **Next line** when everyone has copied it.

The agenda is saved with the day in Our year.

TEACHER TIPS

- **Start 10 minutes before the bell.** The whole routine takes 5 to 10 minutes. Skip any step from the bar at the top.
- **Let students run it.** Every step has a "Leader says" line your helper can read.
- **Hearts, not names.** Votes are a count of hands. Nobody is singled out.
- **Full screen:** press the full-screen button. Everything resizes to fit your board.
- **Good Morning → Schedule → Last Bell.** The three tools share the day on the same computer, so nothing is typed twice.

CURRICULUM CONNECTIONS

Language: oral language through recounting the day and partner talk, printing on primary lines, copying and reading short sentences. **Mathematics:** time vocabulary (yesterday, today, tomorrow, days of the week) and counting school days. **Well-being:** reflection, gratitude and a calm, predictable end to the day.

PRIVACY, PLAINLY

Votes, highlights and reminders stay in the teacher's browser. There are no accounts and no student names. The site counts one anonymous "run" per day, with no cookies or identifiers. The Fixes™ characters and all art are original work of The Fixes Program.

QUESTIONS TEACHERS ASK

Different computer?	Settings and the timeline are saved per browser. Setting up again takes a minute.
No schedule?	It works on its own. Add your subjects in settings and the cards use those.
Does it need internet?	Only to open the page. Everything else works once it is open.
